Professional Summary

Results-driven **Software Developer** with hands-on experience designing, developing, and maintaining high-performance user interfaces and shared web components. Expert at translating complex visual design specifications and Figma layouts into pixel-perfect, accessible, and cross-browser compatible web applications using React.js, Next.js, JavaScript (ES6+), and Tailwind CSS. Proven track record of improving web performance, writing comprehensive unit test suites with Jest, and collaborating effectively within cross-functional Agile Scrum teams to deliver exceptional digital experiences across the entire software development lifecycle (SDLC).

Technical Skills

- **Frontend Frameworks & Design:** React.js, Next.js (App Router, Server Components), TypeScript, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Shared Web Components, Responsive UI Design, Cross-Browser Layouts
- **Testing & Quality Assurance:** Jest, React Testing Library (Unit & Integration Testing), Software Testing Concepts (Functional, Regression, CI Performance)
- **Backend & API Management:** Node.js, Express.js, RESTful API Design & Integration, Asynchronous Programming (Promises, Async/Await), Postman
- **Database & Security:** MongoDB, Mongoose ODM, JWT Authentication, Role-Based Access Control (RBAC), Secure API Error Handling
- **Tools & Practices:** Git, GitHub Workflow, Vercel, Component-Based Architecture, Agile Scrum, Core Web Vitals, Accessibility Standards (WCAG/ARIA)

Professional Experience

Cyberdude Networks

Tiruchengode, India

Frontend Engineer Intern

Oct 2025 – Present

- Design, develop, and maintain responsive user interfaces and shared web components using React.js and Next.js App Router, boosting web feature rendering efficiency by 25%.
- Transform complex visual design layouts from Figma into fully functional, accessible interfaces using Tailwind CSS with 100% cross-browser compatibility and expert hand-coding.
- Integrate user-facing applications with secure backend RESTful APIs using asynchronous JavaScript mechanisms (Promises, Async/Await) tested via Postman.
- Configure Next.js application routing and structured dynamic layouts to decrease page load times and optimize client-side core web vital metrics.
- Collaborate closely with product managers and cross-functional engineering teams during daily standups and Agile sprint ceremonies to break down complex project requirements.
- Authored comprehensive unit and integration test suites using Jest and React Testing Library, maintaining a 90%+ code coverage threshold to ensure robust product delivery.
- Supported backend integration tasks under senior alignment, helping implement clean error handling and secure JWT-based authentication using Node.js and Express.

Technical Projects

SkillSwap – Peer-to-Peer Skill Exchange Platform

[Live Link](#)

Tech Stack: Next.js, React, Node.js, Express, MongoDB, Socket.IO, WebRTC, Tailwind CSS, Jest, Vercel

- Engineered a next-generation full-stack peer matching platform featuring dynamic profiles, session scheduling, and integrated real-time interaction systems.
- Developed over 40+ modular, reusable React components and shared structures, decreasing frontend code redundancy and improving layout maintainability.
- Leveraged Next.js rendering configurations (SSR/SSG) to drop initial page load times by 40% while dramatically elevating Core Web Vitals for a consistent user experience.
- Integrated Socket.IO and WebRTC to manage over 50 concurrent bidirectional communication sessions seamlessly across mobile and desktop breakpoints.

- Applied strict security parameters, utilizing JWT authentication and role-based access to safeguard user interaction spaces and data.

NyayaLite – AI Legal Assistant

[Live Link](#)

Tech Stack: React.js, Node.js, Express, MongoDB, Web Speech API, Tailwind CSS, Firebase

- Built an interactive application hosting over 60+ detailed interactive navigation pathways to provide streamlined guidance and ease platform discovery.
- Embedded Web Speech API configurations to support real-time audio voice processing, broadening platform engagement across low-bandwidth environments.
- Implemented UI components targeting strict accessibility patterns, securing a 95+ Google Lighthouse Accessibility score by following WCAG/ARIA standards.
- Optimized operational state handling on user inputs to mitigate application latency, improving query response tracking by 35%.

Education

JKK Nataraja College of Engineering and Technology

Tiruchengode, India

B.Tech in Information Technology

Aug 2022 – May 2026

- **Relevant Coursework:** Web Technologies, Software Engineering, Database Management Systems (DBMS), Data Structures & Algorithms, Operating Systems
